# WE HELP RESEARCHERS MAKE NEW TREATMENTS POSSIBLE

---

## BBMRI-ERIC

**BBMRI-ERIC is a biobanking infrastructure including more than 550 biobanks from 20 European countries and the International Agency for Research on Cancer.**

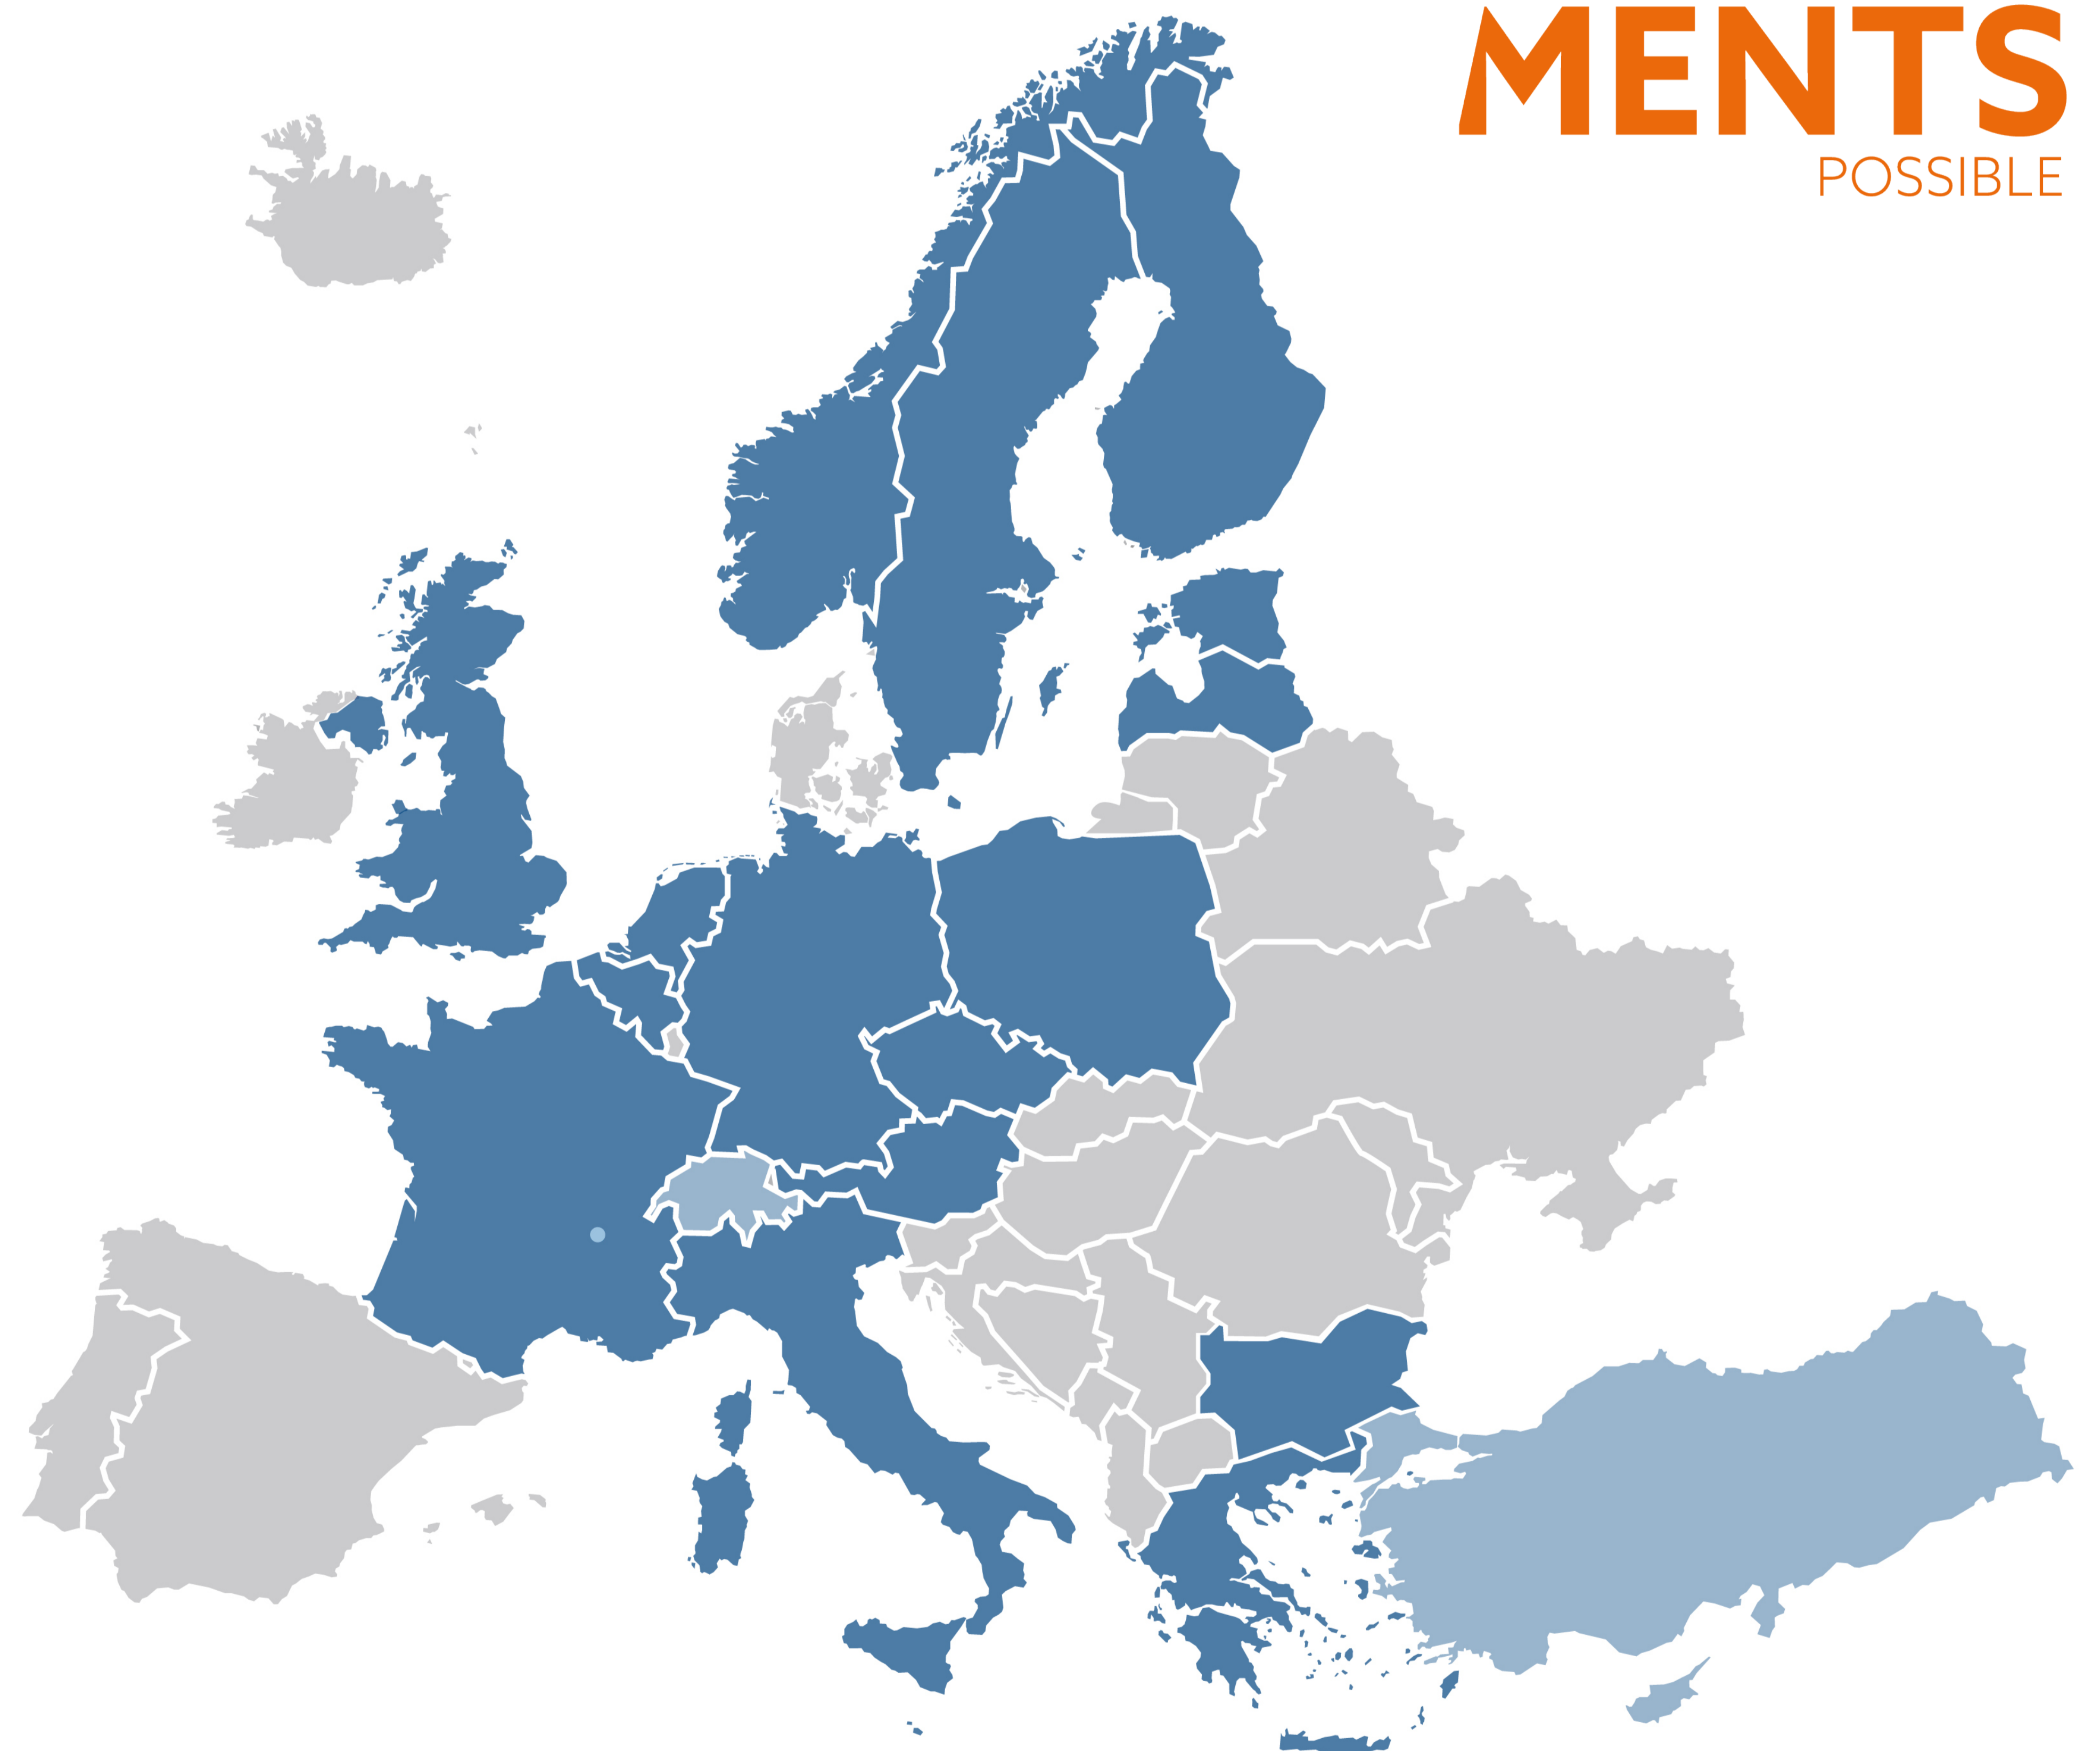

**With its biobanks storing a combined total of 100 million samples, BBMRI-ERIC is a unique resource for researchers all across Europe.**

### MEMBER STATES:

Austria  
Belgium  
Bulgaria  
Czech Republic  
Estonia  
Finland  
France  
Germany  
Greece  
Italy  
Latvia  
Malta  
Netherlands  
Norway  
Poland  
Sweden  
United Kingdom

### OBSERVER STATES:

Cyprus  
IARC/WHO  
Switzerland  
Turkey

What if a team of researchers cannot find right the samples and data in the country they are based in? Would it not be great if they could go online and look for samples elsewhere? What if they find samples in another country, but do not know enough about the legal implications of a cross-border sample transfer? Can they even rely on the sample quality?

That is why BBMRI-ERIC was set up; to bring together all the main players from the biobanking field – researchers, biobankers, industry, and patients – in order to make new treatments possible.
